

Whether your needs are for Ultra High Purity gas distribution or handling or industrial gases, Aztech Controls has the expertise and design experience to bring your requirements to life.

For clean applications, your gas system will be manufactured in our 2000 square foot class 10 cleanroom. We have onsite analytical capabilities backed up with the assurance of quality from a well known 3rd party quality control group.

Our documentation of your project is second to none with 3D or 2D CAD, an online collaborative software for sharing technical data, and a well established process for engineering change controls and product acceptance.

Aztech Controls ships and supports companies throughout the world including all of Asia and Europe.

Trust our team to deliver your project needs, on time, as expected and with a competitive cost.
